### How to Order:

1. Capture Your Product: Take 8 photos of your object from different angles (follow our Turnaround Sheet Guide).
2. Requirement: Ensure a minimum resolution of 1024x1024 pixels (higher is recommended).
3. Submit: Send your images to us to begin the process.

### Examples & Guides for taking photos

## Photo Submission Guidelines (Turnaround Sheet: 8 Images)

1. To ensure the highest quality 3D generation, please follow these recommendations:
2. Object & Background : Provide a single, clearly defined object against a solid white background.
3. Resolution : High-resolution images (ideally 1024x1024px or higher) in .PNG format.
4. Lighting : Ensure the object is well-lit, sharp, and clean (avoid blur or low-contrast images).

## Things to Avoid:

1. Text & Multiple Objects: Avoid text overlays or having multiple items in one frame.
2. Complex Details: Very fine details or thin structures (like long hair) may not generate accurately.
3. Environmental Effects: Avoid smoke, fog, or particles that obscure the object.
4. Low Contrast: Ensure there is a clear distinction between the object and the background.

## Service Details & Delivery

1. **Turnaround Time:** Your project will be completed within **3 business days**.
2. **Delivery :** We will provide you with a **direct URL** to view your 360 Photo & 3D Model hosted on our website.
